

Investing Responsibly

- Global Ethical High Yield

This fund's approach

Detailed ESG Integration	Yes
Stewardship	Yes
Best-in-class	No
Exclusions	Yes

ESG Integration

Qualitative & quantitative consideration of ESG throughout fundamental investment process. Impacts selection, analysis, valuation and portfolio construction.

Stewardship

Engagement: On various ESG issues, both directly by our investment teams, collaboratively with other investors, & via service providers.

Exclusions

No Sparinvest funds invest in companies with confirmed involvement in production or distribution of controversial weapons. This ethical fund also applies Norm- and Sector-based exclusions.

Transparency

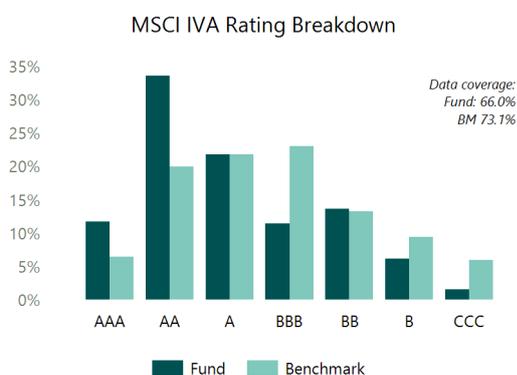

We recognise that many investors wish not only to see what their investments are achieving in terms of financial returns, but also to understand their impact on broader society. We are committed to providing our investors with that understanding.

How we invest responsibly

At Sparinvest, investing responsibly is central to our aim of providing clients with strong and sustainable long-term investment returns. ESG issues present companies, and countries, with a variety of opportunities and risks, and the way these are handled can materially affect long-term value. This mind-set is deeply engrained in our investment teams.

This fund is compared to ICE BofAML Global High Yield - EUR Hedged

ESG profile

Investing responsibly is not a simple question of investing in only a few 'perfect' companies, and the underlying issues are usually not black and white.

This is not a 'best-in-class' fund, but one with diversified holdings. Our strength lies in analysis and understanding of ESG issues, and factoring that understanding into our investment decisions. This fundamental approach to ESG can lead to a relatively strong ESG profile, but instead of focussing on static ESG scores, we believe that value is often generated through positive change. We believe in working with companies to encourage stronger sustainability.

Signatory of:

Stewardship - Engagement

During the last 12 months, Sparinvest had dialogue on ESG issues with 0 companies on behalf of the fund. This includes engagement, and communication regarding voting. Issues include: carbon and climate risk, human rights, and board structure including gender diversity.

Engagement is predominantly carried out in-house by our investment teams. We also join other institutional investors in collaborative engagements, including via the Climate Action 100+. We also make use of collaborative engagements via service providers in some circumstances.

Exclusions

Controversial Weapons Exclusions

No Sparinvest funds invest in companies with confirmed involvement in production or distribution of controversial weapons (anti-personnel mines, cluster munitions, biological weapons, chemical weapons, or nuclear weapons outside the Nuclear Non-Proliferation Treaty). The fund's investment universe is broader than the benchmark, but for reference, the above criteria currently exclude 0.03% from the benchmark.

Sector-Based Exclusions

Alcohol

Tobacco

Gambling

Pornography

Weapons

Thermal coal

Oil sands

Companies are assessed for revenue exposure to these activities and certain thresholds apply. These criteria currently exclude an additional 7.04% from the benchmark.

Norm-Based Exclusions

Human Rights

Labour Standards

Environment

Anti-corruption

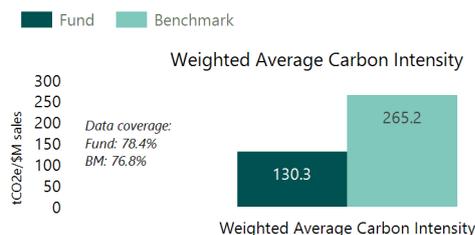

In these four areas, companies are assessed for violations of international norms, like UN Global Compact principles. Companies with verified violations, which they have failed to address, are excluded. This excludes an additional 3.35% from the benchmark.

Cumulative exclusionary impact: 13.70% of the benchmark

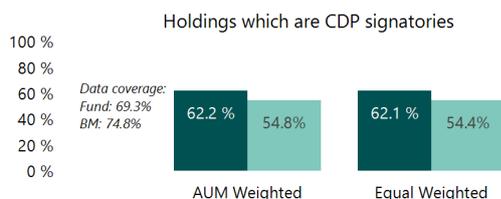

The fund's investment universe is broader than the benchmark, but for reference, the above criteria currently exclude at least 13.70% of the benchmark.

Selected ESG data

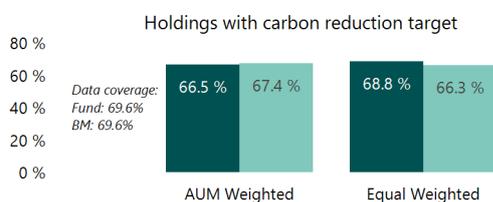

Environment

Weighted average carbon intensity provides an indication of portfolio exposure to potential climate change-related risks (such as carbon pricing), relative to the benchmark.

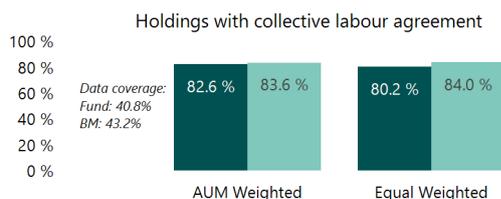

The CDP (Carbon Disclosure Project) is a global disclosure system, enabling measurement and management of environmental impacts. Improving disclosure levels for carbon emissions, and other environmental impacts, is a crucial step in enhancing management of those issues.

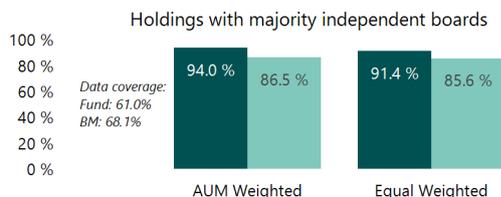

As a signatory to the PRI Montreal Pledge, we disclose the fund's carbon footprint. We are also active participants in Climate Action 100+ and engage directly with companies urging them to set reduction targets.

Social

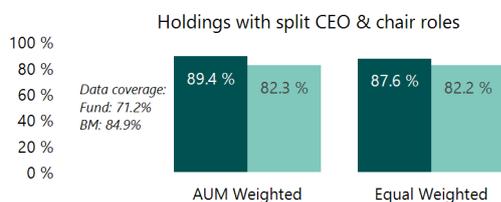

Approaches to labour agreements vary by country, but management disregard for employee rights can be counter-productive over the medium to long-term.

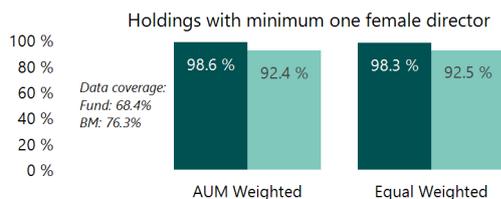

Governance

As bondholders, we do not vote on independent boards. We do however favor high levels of independence on boards and place an emphasis on this topic in our conversations with companies.

We believe the board should provide effective independent oversight, and prefer the roles of board chair and chief executive to be separate.

We believe there are long-term benefits to various forms of diversity in the board, including gender diversity.
