ANNFX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable Product name: Global Ethical Legal entity identifier: 5493002GYTWIB4B51790 investment means an High Yield investment in an **Environmental and/or social characteristics** economic activity that contributes to an environmental or Did this financial product have a sustainable investment objective? social objective, provided that the investment does not It made sustainable investments Χ It promoted Environmental/Social significantly harm any with an environmental objective: (E/S) characteristics and while it did environmental or not have as its objective a social objective and sustainable investment, it had a that the investee proportion of 34.93% of sustainable companies follow good governance investments practices. in economic activities that qualify as with an environmental objective in Х environmentally sustainable under the The **EU Taxonomy** is a economic activities that qualify as **EU Taxonomy** classification system environmentally sustainable under the laid down in **EU Taxonomy** Regulation (EU) in economic activities that do not 2020/852, qualify as environmentally sustainable with an environmental objective in establishing a list of under the EU Taxonomy economic activities that do not qualify environmentally as environmentally sustainable under sustainable economic the EU Taxonomy activities. That Regulation does not with a social objective Χ lay down a list of It made **sustainable investments** socially sustainable with a social objective: % economic activities. It promoted E/S characteristics, but Sustainable did not make any sustainable investments with an investments environmental objective might be aligned with the

Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Sub-Fund's environmental and social characteristics were measured, among other things, through the underlying investments' carbon footprint and alignment with the Sustainable Development Goals. At the same time, through its stewardship, the Sub-Fund tried to influence the companies in a sustainable direction. Through the selection of companies that contributed positively to society's challenges and as part of the Sub-Fund's stewardship, the Sub-Fund sought to reach its minimum share for sustainable investments. The Sub-Fund reached its guaranteed proportion of sustainable investments. The Sub-Fund's share of sustainable investments and share of sustainable investments with an environmental objective aligned with the EU Taxonomy were above the minimum proportion.

In addition, the Sub-Fund promoted social and environmental characteristics through the inclusion of sustainability considerations in the various parts of the investment process. This was done through exclusion, selection of investments and stewardship. The Sub-Fund's alignment with the UN Sustainable Development Goals was higher than the benchmark. The Sub-Fund's weighted average carbon intensity (scope 1 and 2, ton CO2e per. mil. euro revenue) was lower than the benchmark The Sub-Fund's carbon footprint (scope 1 and 2, ton CO2e per. mil. euro invested) was lower than the benchmark. For the reporting period, there was particular focus on the exclusion of issuers that produced controversial weapons, were in systematic breach of international norms and principles, as well as issuers that were considered climate transition laggards. During 2023, the list of transition laggards with high climate risks was expanded to also include companies that expanded their production in violation of the International Energy Agency's Net Zero Emissions 2050 scenario. The Sub-Fund exercised stewardship. The exclusion criteria were implemented and adhered to.

How did the sustainability indicators perform?

Date	Indicator	Fund Value	Fund Coverage	Share Estimated Data	BM Value	BM coverage	BM Estimated Data
2023-12-31	Aggregated alignment with UN Sustainable Development Goals	0.03	69.25%		-0.14	75.17%	
2023-12-31	Scope 1 and 2 GHG emissions per million euro invested	143.37 tCO2e/€M invested	65.80%	56.24 %	188.04 tCO2e/€M invested	68.31%	53.59%
2023-12-31	Scope 1 and 2 GHG emissions per million euro sales	243.05 tCO2e/€M sales	71.12%	54.10 %	408.53 tCO2e/€M sales	76.79%	53.59%

2023-12-31	Scope 1 and 2 GHG emissions	14544.94 tCO2e	65.80%	56.24 %	i e		
Date	Indicator	Fund Value	Fund Coverage	Share Estimated Data	Goal Value	_	
2023-12-31	Share of sustainable investments	34.93%			50.00%		
2023-12-31	Share of sustainable investments with an environmental objective aligned with the taxonomy	1.67%	67.27%		2.00%		

We have reported on a number of sustainability indicators. The sustainability indicators were not subject to auditing. Data sources from a number of third parties were used to measure the environmental and social indicators. MSCI ESG Research was the primary supplier of ESG data and analysis. Reported data from issuers and information from external parties such as from authorities, media and interest organizations were also used. Due diligence was performed on all data sources.

The Sub-Fund had a preference for reported data from issuers, but as this was only available to a limited extent, estimated data was also used.

We have reported on a number of sustainability indicators. The sustainability indicators were not subject to auditing. Data sources from a number of third parties were used to measure the environmental and social indicators. MSCI ESG Research was the primary supplier of ESG data and analysis. Reported data from issuers and information from external parties such as from authorities, media and interest organizations were also used. Due diligence was performed on all data sources.

The Sub-Fund had a preference for reported data from issuers, but as this was only available to a limited extent, estimated data was also used.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments contributed to the achievement of the UN Sustainable Development Goals, reduction of carbon emissions, to climate change mitigation and climate change adaption, or the improvement of board diversity.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were assessed against The Sub-Fund's DNSH-criteria, which excluded issuers with >5% revenue exposure towards fossil fuels, tobacco, alcohol, pornography, nuclear and weapons activities, as well as issuers that were strongly misaligned with the UN Sustainable Development Goals, from being assessed as 'sustainable investments'. The Do No Significant Harm and minimum-safeguards criteria were implemented through a list of issuers that did not meet the criteria. The list was used to check all sustainable investments to ensure that no issuer on the list was not classified as a sustainable investment. The DNSH-criteria used information on controversies, misalignment with the environmental UN Sustainable Development Goals involvement in fossil fuel activities as part of the DNSH compliance check. The minimum safeguards excluded all issuers from being assessed as 'sustainable investments' if they had been involved in persistent violation of international norms, production or distribution of alcohol, weapons, adult entertainment, tobacco or gambling.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Sub-Fund incorporated information regarding principal adverse impact on sustainability factors in the investment process. The negative impacts were considered in investment decisions as well as stewardship, where negative impacts were sought to be mitigated and where long-term value creation was secured. All of the mandatory Principal Adverse Impact indicators were taken into account on the sustainability factors to the extent that the data was available. The adverse impacts were identified in three different approaches. All investments were assessed against the UN Sustainable Development Goals. If an issuer had a strong negative impact on any of the SDG's it was identified as an adverse impact and the investment could not have a positive impact on sustainability. All investments with more than 5% revenue from fossil fuels, were also identified as having an adverse impact. This also applied to any investment in violation of the UN Global Compact principles or the OECD Guidelines for Multinational Enterprises.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund conducted screenings of all sustainable investments, and issuers assessed as being in violation of OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights were not assessed to be sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impacts on sustainability factors:

- · GHG Emissions
- Carbon Footprint
- GHG Intensity of investee companies
- Violations of UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Board gender diversity
- Exposure to controversial weapons (anti-personel mines, cluster munitions, chemical weapons and biological weapons)

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 96.14%

Our method for calculating sustainable investments ensured that the principiple regarding double counting with regards to the UN sustainable development goals was adhered to. This was done by dividing the different types of sustainable contribution into taxonomy-related sustainable investments, other environmentally sustainable investments or socially sustainable investments, based on where they had the greatest contribution.

What was the asset allocation?

The Sub-Fund invested primarily in listed bonds, while deliberately maintaining a small cash reserve to increase flexibility. Likewise, the Sub-Fund had the option of holding smaller positions in other financial instruments, these were also limited. The Sub-Fund's investments are all subject to the sustainability characteristics of the Sub-Fund.

The Sub-Fund's asset allocation was the following:

The percentage of sustainable investments was 34.93%

Data has not been available for transitional and enabling activities and therefore we have no data to report on.

The Sub-Fund's share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 13.29%

The Sub-Fund's share of sustainable investments with an social objective not aligned with the EU Taxonomy was 20.20%

The calculation of "Taxonomy-aligned" was calculated on activity level, while the calculation of "Other environmental", "Social" og "#1A Sustainable" was calculated using portfolio weights. The sum of "Other environmental", "Social" og "Taxonomy-aligned" was therefore not necessarily equal to "#1A Sustainable".

Asset Allocation	Percent
#1 Aligned with E/S characteristics	96.14%
#1A Sustainable	34.93%
#1B Other E/S-characteristics	61.21%
Taxonomy-aligned	1.67%
Other environmental	13.29%
Social	20.20%
#2 Other	3.86%

Asset allocation

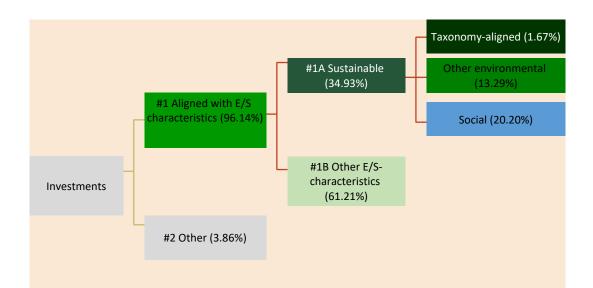

describes the share of investments in specific assets.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Date	Section	Division	Weight
2023-12-31	FINANCIAL AND INSURANCE ACTIVITIES	Financial service activities, except insurance and pension funding	27.83%
2023-12-31	MINING AND QUARRYING	Mining of metal ores	7.78%
2023-12-31	MINING AND QUARRYING	Extraction of crude petroleum and natural gas	6.09%
2023-12-31	ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	Office administrative, office support and other business support activities	5.44%
2023-12-31	INFORMATION AND COMMUNICATION	Publishing activities	3.61%
2023-12-31	FINANCIAL AND INSURANCE ACTIVITIES	Insurance, reinsurance and pension funding, except compulsory social security	3.17%

2022-12-31	MANUFACTURING	Manufacture of motor vehicles, trailers and semi-trailers	2.52%
2022-12-31	TRANSPORTATION AND STORAGE	Water transport	2.52%
2022-12-31	INFORMATION AND COMMUNICATION	Telecommunications	2.06%

Taxonomy-aligned activities are expressed as a share of:

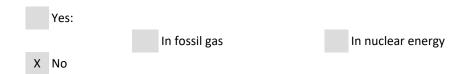

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

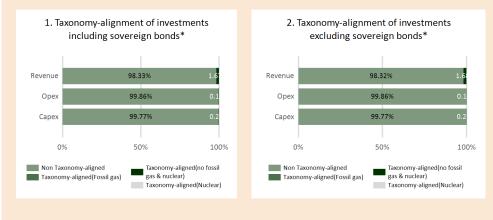

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund's share of sustainable investments with an environmental objective aligned with the EU Taxonomy was 1.67%. The taxonomy alignment numbers has not been audited.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Data has not been available for transitional and enabling activities and therefore we have no data to report on.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund had the following historical taxonomy alignment:

- 2023: 1.67%
- 2022: 2.03%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund's share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 13.29%

What was the share of socially sustainable investments?

The Sub-Fund's share of socially sustainable investments was 20.20%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments incuded under 'Other' consisted of cash holdings. The cash holdings were used for liquidity purposes. There were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund promoted social and environmental characteristics through the inclusion of sustainability considerations in the various parts of the investment process. This was done through exclusion, selection of investments and stewardship. The Sub-Fund's sustainability characteristics were met. The Sub-Fund conducted screenings of all investments and assessed whether issuers were in violation of OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. The exclusion criteria were implemented and adhered to. The list of transition laggards with high climate risks was extended to also include companies that expanded their production in violation of the International Energy Agency's Net Zero Emissions 2050 scenario. However, a few issuers were exempt, as they had simultaneously had taken significant transition actions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

How does the reference benchmark differ from a broad market index?

This was not relevant as the Sub-Fund did not have an ESG reference benchmark.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This was not relevant as the Sub-Fund did not have an ESG reference benchmark.

How did this financial product perform compared with the reference benchmark?

This was not relevant as the Sub-Fund did not have an ESG reference benchmark.

How did this financial product perform compared with the broad market index?

This was not relevant as the Sub-Fund did not have an ESG reference benchmark.
